

Artist: Ross Harper
Title: Simplicity

Release Date: 12th March 2012
Release ID: CW038

This new wave of Ross Harper's music is drawing attention from some big names such as Markus Schulz, Dave The Drummer, Mattias Fridell, Audio Injection, Luke Creed, Concrete Djz and Patrick DSP to name a few. Under his old DJ Ross The Red moniker Ross also saw support from none other than the legendary Laurent Garnier for his "Walking In the Clouds" remix. So with such high level support an interesting question is what inspires these projects? It is really a journey of discovery, a searching for the perfect musical structure that must be built. It is a longing really, an obsession, a deep desire and hunger that can only be fulfilled in an exploration of new sound. Like satisfaction can only be found in that creation space. Sharing it takes second place, while image is way down the line in order of priorities. Progress is being made on this journey but it has only really just begun.

Simplicity (Original Mix) ▶

The Original Mix is the clearest and lightest of the lot. It allows the listener immediate insight into the various components and doesn't have the same "upfront and intense" vibes of the Dub versions. The mastering too reflects this stance being less bass heavy to keep a more balanced mix.

Simplicity (Dark Dub) ▶

Deep throaty bass draws spilled over crispy snares and indescribable glitch manifestations. In line with Ross's current style the sound montage gradually thickens and until a distorted acid squeal takes us into a breakdown where a tonal feeling feeds back to the pounding beats.

Simplicity (Divergence Dub) ▶

Cut back in length for faster progressions and with a more percussive breakdown that keeps the bass growl. This version is snappier and thus would fit in a more quick-fire techno set.

Simplicity (Twisted Crush Mix) ▶

You can feel the thump and slap in this version! The techno percussions just layer in to create an awesome wall of sound that then just slips into the intense breakdown. The tension rises as the "Twisted Crush Mix" erupts into the second section. One for the deep crew.
