Title: Dude inc remixes

Release ID: CW110x

Dude is the next instalment from Vasili Carlson in the build-up to his forthcoming album which due out on City Wall later this year. Remixes from Ross Harper and Tuomas Rantanen make this a neat little single. Dude has that “something special” edge that will grab you, the combination of the driving, searching hook and the unique vocal sample give the track real character. Vasili says the inspiration derives from a book about DNA and human instinct, he got a friend to read some verses from the book and then applied some heavy processing to come up with the crazy talk in the breakdown, quality! Vas is one of those characters who is literally always making new music, unfinished projects scatter his hard drives like road kill! Also watch out for his work under the name of KODEN? (intentional question mark) whereby you’ll hear a bit more of a hardware sound.

Dude (Original Version) ▶

This is raw progressive house music. The absolutely tantalizing hook draws you in and cannot help but get you boogeying. Then the icing on the cake is the mystifying vocal sample in the breakdown, it just has that edgy kind of vibe and Vasili has got the lo-fi just right so it is not quite possible to understand. Perfect!

Dude (Ross Harper Remix) ▶

This ones a real marcher of a beat, and when coupled up with the driving progressive elements of Vasili Carlson’s original the result is an intense journey truly into the eye of the storm. And indeed it is in the breakdown that a new uplifting trancey riff appears and literally lifts everything off to the next level.

Dude (Tuomas Rantanen Remix) ▶

As usual Tuomas looks at things in a different way from the others and comes out with searching piece of tech that leaves the listener both wanting more but also wondering “what was that?”. Giant’s footsteps of beats thunder through a squadron of swirls, squeaks and squelches, all set to the chorus of cavernous reverbs.
